

Functional Features Included in the Solution

Project Name: CaptionAI: AI-powered social media caption generator

Date: 7 July 2026

Team Name: Anupriya

Maximum Marks: 5 Marks

SN PDF	Feature Name PDF	Description & Purpose PDF	Module / Layer PDF	Status PDF
1	User Authentication	Secure registration, login session tracking, and single sign-on using JWT and OAuth 2.0 (Gmail/LinkedIn integration).	Auth Module	Completed
2	AI Caption Generation	Core text execution engine that takes custom text inputs and leverages the OpenAI endpoint to build tailored social copy.	Core Logic Layer	Completed
3	Tone Parameter Selection	Allows users to pick specific styling parameters (e.g., witty, corporate) via drop-downs to modify AI phrasing layouts.	Frontend UI	Completed
4	Platform Constraint Filter	Automatically adjusts string bounds and sets hashtag structures optimized for specific networks like Instagram or LinkedIn.	Core Logic Layer	Completed
5	Persistent Generation History	Saves user contextual input strings and matching historical generated variations into a database layout for seamless future retrieval.	Data / Storage Layer	Completed

SN PDF	Feature Name PDF	Description & Purpose PDF	Module / Layer PDF	Status PDF
6	Interactive Dashboard Workspace	Side-by-side workspace window grouping contextual text parameter inputs with modular responsive text output cards.	Frontend UI	Completed
7	Instant Export Utility	A single-click UI clipboard handler utility button allowing text contents to be instantly copied to the operating system clipboard.	Frontend UI	Completed
8	API Gateway & Rate Limiting	Manages active routing pathways securely while enforcing strict application transaction access ceilings per active account token.	API Gateway Layer	Completed
