

Project Initialization and Planning Phase

Project Name: CaptionAI: AI-powered social media caption generator

Date: 7 July 2026

Team Name: Anupriya

Maximum Marks: 3 Marks

Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A solo small business entrepreneur managing my own digital marketing.	Consistently generate engaging, platform-optimized captions, hashtags, and CTAs for Instagram and LinkedIn.	I waste hours fighting writer's block every day, and manually keeping up with formatting changes is exhausting.	I am running the entire business operations alone without a budget to hire a dedicated copywriter.	Overwhelmed, stressed about missing post schedules, and anxious about low user engagement.
PS-2	A freelance social media manager handling multiple client accounts.	Scale content creation and quickly switch between brand voices for different niche products.	Crafting unique copy manually for 5+ different industries every single day causes extreme creative burnout.	Clients expect high-quality daily posts across multiple channels within a strict, limited contract budget.	Exhausted, creatively blocked, and worried about failing to meet client content deadlines.
PS-3	A digital marketing student launching a college festival promotion.	Design a high-converting, visually striking promotional layout and match it with viral, high-energy text copy.	Standard AI text tools output generic corporate responses that don't match our vibrant campus aesthetic or formatting guidelines.	Generic models lack specific rules to control single-symbol hashtag formats and multi-tone audience variations simultaneously.	Frustrated by repetitive text outputs, restricted by short setup times, and pressured to drive high student turnout.
