## Brainstorming & Idea Prioritization

**Date:** 7 July 2026

**Team Name:** Anupriya

**Project Name:** CaptionAI: AI-powered social media caption generator

**Maximum Marks:** 3 Marks

### Step 1: Brainstorm and Idea Listing.

| S.No | Team Member | Idea / Suggestion                                                                                                                                                                                                                    | Category                         | Group No. |
|------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-----------|
| 1    | Anupriya    | <b>AI Social Media Caption &amp; Hashtag Hub:</b> A glassmorphism web tool that takes product details and instantly outputs tailored captions, single-symbol hashtags, and CTAs for Instagram and LinkedIn via low-latency LLM APIs. | Content Creation / AI Automation | Group 1   |
| 2    | Anupriya    | <b>AI Resume &amp; Portfolio Customizer:</b> An application that parses a student's resume PDF and dynamically targets it to match specific tech startup job descriptions.                                                           | EdTech / Career Tools            | Group 2   |
| 3    | Anupriya    | <b>Smart Study Audio Converter:</b> A learning platform that turns complex business textbook PDFs into interactive, conversational podcast revision scripts for busy students.                                                       | EdTech / Multimodal              | Group 3   |
| 4    | Anupriya    | <b>Automated Cold Email Writer for Startups:</b> A tool helping small business founders instantly generate professional B2B outreach sequences based on basic industry inputs.                                                       | Business B2B SaaS                | Group 4   |

## Step 2: Idea Prioritization

| Group No. | Final Idea                                        | Feasibility(High /Medium/Low)                                                                        | Importance(High/Medium/Low)                                                        | Priority | Selected(Yes/ No) |
|-----------|---------------------------------------------------|------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|----------|-------------------|
| Group 1   | AI Social Media Caption & Hashtag Hub (CaptionAI) | High (Simple Flask API integrations, immediate tangible output, fast deployment)                     | High (Crucial for modern small business digital marketing strategies)              | 1        | Yes               |
| Group 2   | AI Resume & Portfolio Customizer                  | Medium (High algorithmic complexity in mapping specific skills dynamically)                          | High (Valuable for job seekers but complex for a quick single-developer launch)    | 3        | No                |
| Group 3   | Smart Study Audio Converter                       | Low (High processing overhead; generating text-to-speech audio pipelines requires intensive hosting) | High (Incredible revision utility, but technically heavy for this timeline)        | 4        | No                |
| Group 4   | Automated Cold Email Writer for Startups          | High (Relatively simple backend prompt engineering mapping text inputs)                              | Medium (Lower daily user engagement loops compared to rapid social media creation) | 2        | No                |
